

# Camping Together, Safely!

## REMEMBER:

- \* OUTDOORS IS BEST
- \* MASK UP INDOORS
- \* WASH YOUR HANDS

*When you are ready, we are ready for you! We are committed to providing a safe and enjoyable experience for every camper and group and to operate in full accordance with federal and state health guidelines and camping industry best practices.*

*Doing as much as we can outdoors to keep fresh air circulating is key to camping safely. This plan details our efforts to ensure that we are taking every precaution to keep our campers healthy during Denton Camp sponsored events. These procedures need to be followed, as applicable, for all groups using our facility.*

*While we have every reasonable preventative measure in place, we can not guarantee that you or your family may not be exposed or infected with Covid-19 or other illness. **By gathering and attending an event at Denton Camp, you voluntarily assume all risks.** We ask that all guests and staff take every precaution, following these guidelines and all current state and local regulations to help us camp together, safely.*

## Pre-Camp & Check-In

Denton Camp will do everything possible to ensure our guests stay healthy and camp safely, including offering full refunds up to the day of camp for any campers that must stay home from camp due to symptoms, **but we need our guests to do their part before coming to camp.** We strongly ask:

1. 14 days prior to arrival, we ask all guests to avoid non-essential travel and any unnecessary risks of exposure.
2. Self-monitor for symptoms for at least 72 hours prior to arrival and to stay home if you are feeling unwell.

## NEW Drive-Thru Check-In (for Kids/Youth Camps)

To reduce the risk of spread of COVID-19, we will exercise modified check-in procedures at camps. This includes:

1. Drive-thru, check-in with staggered check-in time slots (Parents will be asked to stay in their vehicle to ensure the least amount of exposure on the grounds from the start.)
2. Temperature checks and health screening questions will be asked at check-in (recent symptoms, possible exposure, etc). Any guest with a temp above 100.4 or symptoms/ exposure will not be admitted.
3. Campers will be asked to wash/sanitize their hands upon arrival and frequently throughout their stay.
4. Head checks for lice performed.

*Note: Modified or additional screening processes may be in place for summer camps. These will be communicated to parents well in advance, according to Health Department guidelines at that time.*

## Compliance

We have been reviewing all camp guidelines provided by the CDC, American Camping Association and our local state and county health departments, and will be adhering to all recommendations as much as possible.

## Smaller Groups

In accordance with the MD State guidelines, campers will be divided into small groups (households) in which they will travel and play together. Families will be encouraged to stay together during family camps. Additionally, we will maintain compliance with building capacity restrictions currently in place at the time of your event (03/21, Capacity limited to 50%).

## Thorough Cleanings

We will be cleaning all common and high-touch areas with CDC approved cleaning supplies and methods before and during Denton Camp events. This includes:

1. Regular cleaning and sanitizing of all handles, door knobs, tables and common activity areas regularly.
2. Sanitizing wipes will be provided in each public restroom for appropriate cleaning and sanitizing in between use if needed.
3. Thorough cleaning and sanitization of all restrooms between groups/events.

## Safely Designed Programs

Each activity we provide will be done as safely as possible. This includes:

1. Practicing social distancing among other “households”.
  2. Having all participants wash and/or sanitize hands before and after any activity.
  3. Indoor activities will practice physical distancing between “households” and facial coverings (as age and developmentally appropriate) when distancing between “households” cannot be accomplished.
  4. Groups will be assigned tables for the entirety of camp and sanitized after use. Tables will be spaced out.
  5. Ensure campers and staff sanitize their hands before and after meals/snacks.
  6. Only offering activities that can either be cleaned or rested long enough between use to disinfect.
- 

## Get Outside!

We will prioritize outdoor activities and programming over indoor activities, when seasonally comfortable.

---

## Food Service Safety

We will fully adhere to all CDC and State of MD food service guidelines. Groups that provide their own food service are asked to follow the same safety procedures.

Including:

1. Follow building capacity limits.
  2. Serve meals outdoors when seasonally comfortable.
  3. When eating indoors, masks must be worn to and from tables.
  4. Appropriate distancing between tables and seating in “households”.
  5. Providing hand washing stations and hand sanitizer at dining facilities. We strongly recommend every camper sanitize/wash as the first stop through the line and after eating.
  6. Serve food “cafeteria-style” instead of self-serve buffets.
  7. Providing napkins/deli tissue for use when touching drink dispensers.
- 

## Overnight Guests

All overnight accommodations will strictly adhere to Health Department guidance.

1. Guests will sleep 6ft apart (head to toe)
  2. Dorm & dorm restrooms will not be entered or used by any other groups on the property.
  3. Deep cleaning of dorms between groups.
- 

## Exposure Plan

Any camper or staff with suspected cases or exposure of COVID-19 will be isolated and all those with possible exposure will be notified (including parents). Md Dept of Health will be notified as required for further instruction on handling cases and exposure.

---

## Screening Questions:

- Have you or any member of your party been in close contact with a suspected or confirmed case of COVID-19?
- Are you or any member of your party experiencing a cough, shortness of breath, or a sore throat?
- Have you or any member of your party had a fever in the last 48 hours?
- Have you or any member of your party had new loss of taste or smell?
- Have you or any member of your party had vomiting or diarrhea in the last 24 hours?
- Have you been vaccinated for Covid-19?
